

WTV Minutes
March 6, 2008

Present; Will Ottery, Chairman; Paul Hague, Vice Chairman; Brad Macauley, Steve Flanders, Ray Eaton

The meeting was called to order at 7:00 p.m. following the live broadcast of introducing the WTV volunteers, about a 35-minute program. This was the first broadcast from the studio, and we were checking to see how the equipment was functioning. All volunteers were mentioned, but those present were introduced and given an opportunity to express themselves and tell why they were interested in WTV. We had several messages after the program and most comments were on the poor audio. That's why we wanted to be first on a live program so improvements could be made.

We discussed the Bicycled Programs, those received from other community access stations for us to broadcast until we are producing local programs. The motion was made and approved for WTV to run these at a time that would be convenient and not interfere with local programs. We now need to set a schedule and let Lisa Johnson know so they can be listed on the bulletin board. Paul will start this, but we need another member to take over this program. Paul cannot do all production at the studio.

The WTV questionnaire was discussed and handing them to the voters after the residents vote on March 11th. The Questionnaire is asking them what they would like to see and learn from Channel 6. These questions hopefully will give the residents some input into our programming. Of those present Will, Brad, and Steve will work out a schedule and ask for more volunteers. The polls are open from 7 a.m. to 7 p.m., so we need help. We will approach the voters after they have voted.

The question of training sessions was brought up again. It has been discussed many times before. This is a must for all volunteers to attend so the work load of the station will be shared by all. The production load cannot be carried by just Paul and Walter; we all must participate. A date has not been set as yet, and the public will be invited through the Bulletin Board. We still have some questions to be answered by INTEGRISYS before our training can start. Those present felt it was well worth the time and education we received on opening night.

Next meeting will be Thursday April 3rd at 6:00PM
